

A few words:

My small family consists of my wife and two children. My parents died years back. My wife was suffering from asthma for the last about two decades. Though we had tried to allay the disease by recourse to Ayurvedic and Homoeopathic medicines, they were found unsuccessful and like other similar asthma patients, my wife also started taking allopathic medicines including inhalers having cortisone contents. Though she felt some relief initially, ultimately she became an addict and also another victim of steroids. The dosage of Seroflo taken though was less initially, was to be enhanced periodically, but even then, the relief that was getting thereby had diminished fast. Her body became overfleshed and she found it hard to do even any little job and her life became miserable. She suffered a situation where free breathing was totally disturbed as in a case of being sinked in water. She was frequently telling that she will end soon. This affected our family on the free play in its joints.

In such a situation, I was enquiring whether there is any specialist hospital for allergic asthma. Then I came to know about the Asthma & Allergy Research Centre at Kathrikadavu, Kaloor, Ernakulam headed by Dr. P.E. Abraham. Thereafter, we went there and consulted the Doctor on 28.3.2013 and from that day onwards my wife started taking treatment therefrom.

Though we were not that much confident of getting immediate relief and curing from the disease by recourse to Homoeopathy, the result was amazing. At the time of initial test, her breathing power was found to be only 33%. After four months treatment, her breathing power increased to 42%. Now, nearly six months' treatment has gone by and my wife feels far far better cured and she is recovering from her asthma fastly. Her

confidence improved and she is returning to her normal life. She has already discontinued allopathic medicines and inhalers and she is now easily able to do any work freely.

Here, I wish to say a few words. Due to the asthma which was being suffered by my wife for the past several years and on her being put to the worst condition and she being the victim of poisonous substances of allopathic medicines, we were at a dilemma and standstill and it affected our entire family adversely. In a sense, our family was handicapped and now, by the miraculous treatment given by the Doctor, my whole family is re-energized. I came across an article in a magazine wherein it was titled that Dr. P. E. Abraham is the last word in asthma. From our experience, we can blatantly emphasize that Dr. P.E. Abraham is the final word against any kind of allergic asthma which will hopelessly surrender before him who is a well researched scholar and who has made His indelible hallmark in this field. We record our whole-hearted gratitude for having become a beneficiary of His indepth research results.
